Commander's Legal

Handbook Judge Advocate General's Legal Center and School (United States. Army) 2012-06-15 This Handbook is designed to assist Army Commanders in taking proper immediate action when faced with a variety of legal issues that might arise during your command. The purpose of your actions should be to preserve the legal situation until you can consult with your servicing Judge Advocate. However, like most aspects of your command responsibilities, you can fail if you just wait for things to come to you. You need to be proactive in preventing problems before they occur. In the legal arena, this means establishing and enforcing high standards, ensuring your Soldiers are fully aware of those standards and properly trained to comply with them. You must also properly train your Soldiers on all Army policies

and higher level command standards so that they also understand and comply with them. Soldiers must also be well-versed in the Army Values and be able to apply those values to real- world situations, which will usually keep them well within legal bounds. Topics include: THE TOP TEN SITUATIONS WHERE YOU SHOULD IMMEDIATELY CONSULT YOUR SERVICING JUDGE ADVOCATE MILITARY JUSTICE/CRIMINAL LAW Introduction to Military Criminal Law Misconduct: Options and Duties Of The Commander Unlawful Command Influence R.C.M. 303 Preliminary Inquiry Non-Judicial Punishment, Article 15, UCMJ Article 15 Script Search and Seizure Self-Incrimination, Confessions, and Rights Warning UCMJ Punitive Articles Urinalysis, Drug and Alcohol Policies Fraternalization and Improper Senior-Subordinate Relationships

Military Ministry Paul E.
Linzey 2022-05-09 The
church is called to provide
clergy for the military.
Seminaries educate and
prepare students. But there
are complexities,
controversies, and
criticisms. Many seminary
and college professors have
no experience in the
military. Understanding
these dilemmas, Paul Linzey
and Keith Travis created a
much-needed resource.
They both have mentored
hundreds of chaplains,
pastors, and ministerial
students. The result is a

comprehensive book about
serving as a military
chaplain in the twenty-first
century. Drawing from their
experience as chaplain,
professor, endorsing agent,
and chief of Army chaplain
recruiting, they provide a
professional resource for
anyone interested in
ministry to people in the
military. Their records,
qualifications, and expertise
combine to provide a
comprehensive, passionate,
and authoritative look at
serving as a chaplain in
today's military. The book is
well-researched, true to real
life, and up-to-date. It is
unparalleled in scope.

Review of the U.S. Army Corps of Engineers Restructured Upper Mississippi River-Illinois Waterway Feasibility Study National Research Council 2005-01-22 For the past few years, the Corps has been working on what is known as the Restructured Upper Mississippi River-Illinois Waterway Feasibility Study, the heart of which is a multibillion-dollar proposal to double the length of up to a dozen locks on the river. The Research Council first reviewed the feasibility study in 2001 during controversies over the accuracy of models being used by the Corps to justify lock expansion based on increased demand for barge transportation. More than 100 million tons of cargo--half of it grain destined for international markets, the other half goods such as construction materials, coal,

and chemicals--are shipped along the navigation system each year. The locks, which along with dams allow barges to traverse uneven river depths, were originally designed for "tows" of barges up to 600 feet long, but the length of a typical tow has increased, forcing the Corps to look for ways to relieve congestion. The book finds the U.S. Army Corps of Engineers has made good progress in broadening its proposed plan for navigation improvements on the Upper Mississippi River-Illinois Waterway system to give greater consideration to ecological restoration. However, the plan still does not provide sufficient economic justification for expanding locks on the rivers because of flaws in the models the Corps used to predict demand for barge transportation. Little attention is paid to inexpensive, nonstructural navigation improvements that could help better

manage existing levels of barge traffic. The revised plan has been usefully expanded to include many creative and potentially useful ecosystem restoration measures. These measures, however, should be more firmly grounded in river science principles and more broadly consider ways the river's ecology might affect or be affected by navigation, recreation and other uses.

United States Army in the World War, 1917-1919 1988

A seventeen-volume compilation of selected AEF records gathered by Army historians during the interwar years. This collection in no way represents an exhaustive record of the Army's months in France, but it is certainly worthy of serious consideration and thoughtful review by students of military history and strategy and will serve as a useful jumping off point for any earnest scholarship on the war. --

Reserve Component Personnel Issues Lawrence Kapp 2011-04 The term "Reserve Component" is used to refer collectively to the seven individual reserve components of the armed forces: the Army Nat. Guard (NG), the Army Reserve, the Navy Reserve, the Marine Corps Reserve, the Air NG, the Air Force Reserve, and the Coast Guard Reserve. These reserve components "provide trained units and qualified persons available for active duty in the armed forces." Since 1990, reservists have been involuntarily activated six times, incl. two large-scale mobilizations for the Persian Gulf War and in the aftermath of 9/11. This increasing use of the reserves has led to interest in funding, equipment, and personnel policy. This report provides an overview of key reserve component personnel issues. This is a print on demand report.

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides
