Red Heat Alex von Tunzelmann 2012-09-13
America's secret war in the Caribbean during the Cold War is revealed as never before in this riveting story of the machinations and blunders of superpowers, and the daring of the mavericks who took them on. During the presidencies of Eisenhower, Kennedy and Johnson, the Caribbean was in crisis, while the United States and the USSR

acted out the world's rising tensions in its island nations. Meanwhile the leaders of these nations - the charismatic Fidel Castro, and his mysterious brother Raúl; the ideologue Che Guevara; the capricious psychopath Rafael Trujillo; and François 'Papa Doc' Duvalier, a buttoned-down doctor with interests in Vodou, embezzlement and torture - had ambitions of their own. Alex von Tunzelmann's brilliant narrative follows these five rivals and accomplices from the beginning of the Cold War to its end. The superpowers thought they could use these Caribbean leaders as puppets, but what neither bargained on was that their puppets would come to life. The United States, in its all-consuming fight against communism, stumbled into one disaster after another. First, with the Bay of Pigs, and then with the Cuban Missile Crisis, it helped bring the world as close to catastrophic nuclear war as it has ever been. Red Heat is an authoritative and eye-

opening account of a wildly dramatic and dangerous era of international politics that has unmistakable resonance today.

Combining Two Cultures Herb Jenkins 2004

Research-intensive universities have long struggled to reconcile the imperative of specialized learning with the need for a broader, more liberal education. Combining Two Cultures provides a comprehensive account of a degree program at a distinguished Canadian university, McMaster, aimed at accomplishing this synthesis. This innovative program has stood up well over more than two decades of its implementation. It has a curriculum balanced between arts and sciences and is committed to developing broadly applicable intellectual skills, above all those that underlie scholarly inquiry into questions of importance to students and to the society they live in. It attempts to harmonize the excitement of exploring a broad range of fields with students' needs to meet the requirements for advanced study in professional and

academic graduate disciplines. This book offers insights into the challenges of planning and establishing a program of this kind. Brief personal reflections from many of the program's graduates, first-hand observations from current students, and instructors' accounts of their experiences give a vivid sense of what the program has meant to its participants.
