ways - as human aspiration, tradition, and necessity. For some people, working overseas is a dream. For others, international labour mobility is a tradition. For a great number of people however, international labour migration is an economic necessity. It is the only viable solution to realize their basic human right to a decent life. GMS worker movements to Thailand typify all three characterizations of international labour mobility. While this book focuses on the economic dimensions of international labour emigration, principally from Cambodia, Laos and Vietnam to Thailand, it recognizes at the very outset

the equal standing of non-economic motivations for migration.

Christianity Across Borders

Gemma Tulud Cruz 2021-07-29

This book offers a comprehensive exploration of key issues in contemporary global migration and considers the theological implications for Christianity, in general, and for Christian faith and practice in various parts of the world, in particular. Migrant Christians, who make up the majority of believers on the move and in diaspora, play an increasingly vital role in world Christianity today. Drawing on cases from across the globe, Gemma Tulud Cruz considers how Christians are faced with immense gifts and tremendous challenges brought by the ever-increasing

presence of migrants in their midst and the conditions that characterize contemporary global migration. Migrant Christians themselves face multiple challenges, which have been made more stark by the coronavirus pandemic. The volume will be relevant to scholars of religion and of migration who are interested in a closer examination of what happens to Christians and Christianity, (faith) communities, and nation-states in the age of migration.

The benefits and challenges of leveraging social media recruitment practices

Hayes 2013-06-25 Thesis

subject Business economics -

Personnel and Organisation,

grade: B, University of Limerick,

course: MA in Business

Management, language:

English, abstract: In the last

decade labour market shortages

and recruitment difficulties have

led to a more competitive and

challenging recruitment market

worldwide. These forces make it more important than ever for recruiting teams in organisations to be effective, efficient and creative in the search for talent. As a response, there is a shift from traditional recruiting methods to a new social recruiting approach. This paper will focus on the differences between traditional and social methods of recruiting, identify the key reasons behind the change and discuss the benefits as well as the potential risks. To measure the success of social recruiting the paper will look at reports from leading social recruiting solution companies and case studies of various sized

organisations. This paper concludes that there has been a significant shift in usage from traditional recruiting techniques to social recruiting, that social recruiting is increasingly being used by both large and small organisations and is fast becoming a favoured medium of both employers and job-seekers alike. It also concludes that organisations cannot ignore the importance of creating a social recruitment strategy, owing to its role in improving cost of hire, quality of hire and time to hire. The findings are based on secondary research of academic books, journals, reports and case studies covering the areas of social

media, recruitment and LinkedIn. The significance of this paper is that it will be a valuable source of information for all organisations looking to leverage social recruiting - and in particular LinkedIn's hiring solutions - to start recruiting. The attached literature review as part of this study is also a good starting point for anyone looking to explore the topics of recruitment, social media and LinkedIn. Brokering Circular Labour Migration Huey Shy Chau
2020-03-30 This book examines the commercialisation of

domestic and care work through private agencies that organise transnational care arrangements by brokering migrant workers.

The book focuses on the emergence of private for-profit home care agencies following the 2011 extension of the Free Movement of Workers to Eastern European Countries agreement in Switzerland. The agencies recruit migrant women from these countries and place them in private households for elderly care. This book explores how circular labour migration for these care workers is facilitated.

In the form of a mobile ethnography, it traces their journey from Eastern European countries to Switzerland – from

when care workers find employment and are recruited by agencies to when they arrive at their designated households.

From the agencies' analytical standpoint, the book examines the recruitment and placement practices of the home care agencies and their role in

facilitating migration. Brokering Labour Migration offers an understanding of new migration patterns and highlights

fundamental changes in migration control with the extension of free movement of workers in Switzerland to lower-wage countries in Eastern

Europe. It will be an invaluable resource for academics and scholars of geography,

anthropology, sociology, and gender and migration.

Labour Mobility in the EU

Kristina Toplak 2018-09-01 V šestih prispevkih monografije so

analizirani obstoječi in porajajoči se izzivi na področju delovne mobilnosti v Evropski uniji, pri čemer jih avtorji obravnavajo skozi prizmo mobilnih delavcev v različnih poklicih. Z večdisciplinarnim pristopom in uporabo različnih metodoloških prijemov so avtorji ustvarili ogrodje za analitične diskusije o učinkih mobilnosti v EU, učinkovitosti in pravičnosti prostega pretoka oseb znotraj EU ter večplastnosti posledic za posameznike, države članice in nacionalne politike.

Prvi prispevek je teoretski uvod v tematiko, ki mobilnost izprno predstavi kot teoretski koncept, politično agendo in temeljno evropsko vrednoto. Kompleksni

preplet mnogoterih uninkov delovne mobilnosti, ki se pojavljajo na ven ravneh, je v nadaljevanju obravnavan v petih študijah primera. Le-te osvetljujejo dileme, paradokse, uninke in posledice notranje mobilnosti v EU na primerih mobilnih zdravstvenih delavcev, umetnikov in kulturnih delavcev, napotenih delavn delavk in visoko izobranenih delavcev. Vsi predstavljeni primeri so rezultat venletnih znanstvenoraziskovalnih prizadevanj in aktivnega delovanja avtorjev v razlinih projektih s podronja mobilnosti.

A Web-Based Approach to Measure Skill Mismatches and

Skills Profiles for a Developing

Country: Jeisson Arley

Cárdenas Rubio 2020-12-30

"Several interdisciplinary studies highlight imperfect information as a possible explanation of skill mismatches, which in turn has implications for unemployment and informality rates. Despite information failures and their consequences, countries like Colombia (where informality and unemployment rates are high) lack a proper labour market information system to identify skill mismatches and employer skill requirements. One reason for this absence is the cost of collecting labour market data. Recently, the potential use of

online job portals as a source of labour market information has gained the attention of researchers and policymakers, since these portals can provide quick and relatively low-cost data collection. As such, these portals could be of use for Colombia. However, debates continue about the efficacy of this use, particularly concerning the robustness of the collected data. This book implements a novel mixed-methods approach (such as web scraping, text mining, machine learning, etc.) to investigate to what extent a web-based model of skill mismatches can be developed for Colombia. The main contribution of this book is

demonstrating that, with the proper techniques, job portals can be a robust source of labour market information. In doing so, it also contributes to current knowledge by developing a conceptual and methodological approach to identify skills, occupations, and skill mismatches using online job advertisements, which would otherwise be too complex to be collected and analysed via other means. By applying this novel methodology, this study provides new empirical data on the extent and nature of skill mismatches in Colombia for a considerable set of non-agricultural occupations in the urban and formal economy.

Moreover, this information can be used as a complement to household surveys to monitor potential skill shortages. Thus, the findings are useful for policymakers, statisticians, and education and training providers, among others."

Labour, Mobility and Temporary Migration Julie Knight

2017-06-15 Labour, Mobility and Temporary Migration delves into sociological research on Polish migrants who migrated to the lesser-explored South Wales region after Poland joined the European Union in 2004. At the time of enlargement, Polish migrants were characterised as being

economically motivated, short-term migrants who would enter the UK for work purposes, save money and return home.

However, over ten years after enlargement, this initial

characterisation has been

challenged with many of the

once considered 'short-term'

Poles remaining in the UK. In

the case of Wales, the long-

term impact of this migration is

only starting to be fully realised,

particularly in consideration of

the different spatial areas –

urban, semi-urban and rural –

explored in this book. Such

impact is occurring in the post-

Brexit referendum period, a time

when the UK's position in the

EU is itself complex and

changing.
