**Adult Origami** Nick Robinson 2004-09 This book reaches the parts that other origami books don't, plumbing previously uncharted depths, uniting the yin and yang bedfellows of an ancient Japanese artform and 21st century toilet humour. Readers who hitherto have only been able to make a humble paper aeroplane, will soon be able to impress their mates down the pub with a jaw-dropping ability to take a scrap of chaste, virgin paper and fashion something that is both artistic and crude. Working through a total of 16 projects, the cultural importance of each subject and the inspiration behind it is discussed, while the origami side of things is explained in simple, step-by-step Anglo-Saxon, with evocative line drawings. Adult Origami will soon have readers making giant sperm, novelty paper boobies or a fully moving schwanstucker, impressing friends and shocking polite family members everywhere.

**Innovation and Transition in Law: Experiences and Theoretical Settings** This book features a discussion on the modernisation of law and legal change, focusing on the key concepts of innovation" and "transition". These concepts both appear to be relevant and poorly defined in contemporary legal science. A critical reflection on the heuristic value of these categories seems appropriate, particularly considering their dyadic value. While innovation is increasingly appearing in the present day as being the category in which one looks at the modernisation of law, the concept of transition also seems to be the privileged place of occurrence for such dynamics. This group of Italian and Brazilian scholars contributing to this volume intends to investigate such problems through an interdisciplinary prism. It includes points of view both internal to legal studies - such as the history of law, theory of law, constitutional law, private law and commercial law - and external, such as political philosophy and history of justice and political institutions.

*The Memoirs of Sir Ronald Storrs* Sir Ronald Storrs 2008-11 SIR RONALD STORRS - PREFACE THIS has not been been an easy book to write. My books and papers were destroyed by fire with the rest of my property in 1931, so that of material, consciously prepared or preserved as such, I have none. I had, however, the habit ever since leaving England in 1904 of writing weekly to my mother, and of enclosing briefly minuted items I thought might entertain her. All these documents she kept with my letters, including a few diaries of special missions or journeys during the Wan In the longest of these, describing Baghdad in 1917, she inked over my pencil version with the result, as in a palimpsest, that some of the words she could not read then I cannot decipher now. These surviving records I have wherever possible quoted in original with, I hope, a gain in immediacy and actuality by recording not only historic facts, sometimes already known, but also my feelings at the time with stories and details, trifling in themselves yet constituting atmosphere the hardest of all things to recapture after many years. There are no corrections but many omissions, especially of personal remarks intended only for home consumption. The retention of many faults of youthful slang and flippancy proceeds not so much from any illusion as to their intrinsic demerits as from a preference for the varied patina of the past over the shiny smoothness of a Vernis Martin surface. The loss of a slowly collected library bearing on the chief interests of a mans life is a handicap, less only than the loss of serious docu ments. Not total replacement, not even the Socialist ideal of the British Museum Library access to everything, possession of nothing can recall the annotations andcross-references of

many years. In a book full of Oriental names it is impossible to avoid the vexed question of transliteration. That is a subject upon which, as indicated, I have strong ideas and even stronger feelings. In 1920 Sir Herbert Samuel made me Chairman of a small Committee appointed for the purpose of transliterating Palestinian Arabic. We worked long and hard, and in due course submitted to His Excellency the neat little viii . Preface brochure which at this moment meets my resentful gaze. By the time it had reached London the Colonial Office had decided to adopt the system of the Royal Geographical Society. Lawrence was pleasant about his spelling members of our Committee cannot be. My object now is to present the strange sounds and symbols of the East with a minimum of fatigue to the reader. The system is that of English consonants with Italian vowels, and I add accents and quantities. There are one or two irregularities. The name of the founder of Islam is accurately rendered to convey the pronunciation of Muhammad even for personages such as Prince Mahomed All, in whose reigning house is a tradition of pronuncia tion alia Turca. By the time the name has reached Cyprus it has become Mehmet. Nevertheless, with a positive advantage of differentiation, I write the Sharif and King Husain ibn All of Arabia correctly according to system but the Prince and Sultan Hussein of Egypt, with the French spelling that comes close to his own Turkish utterance. By holding, though illogically, to accepted spellings of some famous words, I have at least avoided the exasperation of Quran and Makkah and of that in tolerable clenching of the glottis, the letter, ain...

*Ideas That Shaped Buildings* M. Fil Hearn 2003-10-10 Identifying the operative ideas in architectural theory from ancient Rome to the present and codifying them into coherent theoretical systems; for students, practitioners, and the general reader. In *Ideas That Shaped Buildings*, Fil Hearn identifies and codifies into theoretical systems the operative tenets of architectural theory from ancient Rome to the present. With this strikingly original synthesis of architectural history and theory, he constructs an intellectual armature on which virtually any architectural concept, past or present, can be positioned. Dealing mainly with the treatises that have been highly influential historically, he organizes their concepts thematically and analyzes their development through time. Straightforward and concise, *Ideas That Shaped Buildings* is readily accessible to architecture students, practicing architects, and the general public—indeed anyone interested in understanding the design rationale of buildings. Its overarching message is that, far from being constricting, proper knowledge and application of architectural theory is enabling and inspiring, and makes creative freedom possible by providing the conceptual awareness needed to devise a design. After an introductory history of the development of architectural theory, the text is divided into four parts. The first deals with issues relevant to all theories of architecture. The second, treating theory from antiquity to 1800, focuses on the prescriptive conventions inherent in the classical tradition. The third, treating theory after 1800, focuses on the inspirational principles prompted by rationalist perceptions of the Gothic tradition. The fourth, treating theory since 1965, deals with rationales beyond rationalism and the influence of computers on design method and design formulation. The concepts discussed are illustrated with theoretical drawings and images of actual buildings.

**Hugh Maaskant** Michelle Provoost 2014-02-28 Today considered the godfather and forerunner of a generation that includes Adriaan Geuze, Rem Koolhaas, Winy Maas and Willem Jan Neutelings, Hugh Maaskant (1907-1977) was underappreciated for many years. Maaskant led the postwar reconstruction of Rotterdam, designing revolutionary, complex, large-scale buildings, such as the Groothandelsgebouw and Euromast, as well as the Amsterdam Hilton Hotel and the Scheveningen Pier in The Hague. In Hugh Maaskant: Architect of Progress, historian and Maaskant scholar Michelle Provoost orients the architect in an international as well as historical perspective, recounting his work in the context of the optimistic reconstruction of the postwar period as well as the exciting developments of the 1960s and Holland's increasing prosperity throughout that decade. The book features both historical and recent photographs, including a series taken especially for this edition by internationally renowned architectural photographer Iwan Baan.
