Homegoing Frederik Pohl 1990 Science fiction-roman. **Engine Summer** John Crowley 2013-01-10 In the drowsy tranquility of Little Belaire, the Truthful Speakers lead lives of peaceful self-sufficiency ignoring the depopulated wilderness beyond their narrow borders. The overgrown ruins reflect a world outside that is stranger than his people ever dreamed ...

The consequences of their fate reverberate through the generations that follow. Taking us from the Gold Coast of Africa to the cotton-picking plantations of Mississippi; from the missionary schools of Ghana to the dive bars of Harlem, spanning three continents and seven generations, Yaa Gyasi has written a miraculous novel - the intimate, gripping story of a brilliantly vivid cast of characters and through their lives the very story of America itself. The Space Merchants Frederik Pohl 2011-12-06 In a vastly

overpopulated near-future world, businesses have taken the place of governments and now hold all political power. States exist merely to ensure the survival of huge transnational corporations. Advertising has become hugely aggressive and boasts some of the world's most powerful executives. Through advertising, the public is constantly deluded into thinking that all the products on the market improve the quality of life. However, the most basic elements are incredibly scarce, including water and fuel. The planet Venus has just been visited and judged fit for human settlement, despite its inhospitable surface and climate; colonists would have to endure a harsh climate for many generations until the planet could be terraformed. Mitch Courtenay is a star-class copywriter in the Fowler Schocken advertising agency and has been assigned the ad campaign that would attract colonists to Venus, but a lot more is happening than he knows about. Mitch is soon thrown into a world of danger, mystery, and intrigue, where the people in his life are never quite what they seem, and his loyalties and core beliefs will be put to the test.

The World at the End of Time Frederik Pohl 1991 Wan-To was the oldest and most powerful intelligence in the universe, a being who played with star systems as a child plays with marbles. Matter occupied so tiny a part of his vast awareness that humans were utterly beneath his notice. The colonists of Newmanhome first suffered the effects of Wan-To's games when their planet's stars began to shift, the climate began to cool down, and the colony was forced into a desperate struggle to survive. Viktor Sorricaine was determined to discover what force had suddenly sent his world hurtling toward the ends of the universe. And the answer was something beyond the scope of his imagination -- even if he lived for 4000 years...

And yet, the way his eyes linger upon her flesh ignites a sensual craving that can only be satisfied by his touch...

Wolfbane C. M. Kornbluth 2016-01-27 "WE'RE GOING TO FIND OUT MORE, AND THEN WE'RE GOING TO FIGHT! It was enough to curdle the blood. Haendl was proposing to fight--against the invulnerable, the almost godlike Pyramids! Haendl stood up. "Tropile, that's what this is all about!" He gestured around him. "Guns, tanks, airplanes--it's going to be us against them. Never mind the Sheep; they don't count. It's going to be Pyramids and Wolves, and the Pyramids won't win. And then--" He was glowing, and the fever was contagious. Tropile felt his own blood begin to pound. Haendl hadn't finished his "and then--", but he didn't have to. It was obvious. And

then the Earth would go back to its own solar system, and an end to the five-year cycle of frost and hunger. And then the Wolves would rule a world worth ruling. This is a work of fiction. All the characters and events portrayed in this book are fictional, and any resemblance to real people or incidents is purely coincidental.

Electric Life Albert Robida 2013-06-01 In *Electric Life* (1892), Albert Robida imagined the life of the future, imbued with all kinds of fantastic devices meant to simplify the lives of their users. The father of science fiction illustration, and the author of *The Clock of the Centuries* and *The Adventures of Saturnin Farandoul*, Robida (1848-1926) was the most significant of all of Jules Verne's successors. The novel follows the adventures of the great inventor Philox Lorris, who wants his son to marry a woman whom he does not love, instead of his sweetheart, whom Philox dislikes. This traditional love triangle allows Robida to unleash his sarcastic predictions, extrapolating them to what he thought were absurd extremes; but which today's readers will think tame in comparison with our modern world. *Electric Life* no longer qualifies as futuristic fiction, or alternative history, but it does qualify as steampunk fantasy -- perhaps the ultimate steampunk fantasy, given that it possesses an innocence that no modern writer, jaded by an excess of historical knowledge, could ever duplicate. ILLUSTRATED WITH 100 ORIGINAL ILLUSTRATIONS BY ALBERT ROBIDA.

confirmed when he meets Dan Crell. Dan is a quiet man with a great voice. Platinum Pohl Frederik Pohl 2007-01-23 Frederik Pohl, the bestselling author of *The Boy Who Would Live Forever*, is famous for his novels, but first and foremost, he is a master of the science fiction short story. For more than fifty years he has been writing incisive, entertaining SF stories, several hundred in all. Even while writing his bestselling triple-crown (Hugo, Nebula, Campbell Award) novel *Gateway* and the other Heechee Saga novels, he has always written short fiction. Now, for the first time, he has gathered together the best of his many stories. Spanning the decades, these tales are in their way a living history of science fiction. Because Frederik Pohl has been on the frontlines of the field since the halcyon days of the late 1930s, and has written short stories in every decade since. And because he has always been a keen observer of the human condition and the world that is shaped by it, his stories reflect the currents of political movements, social trends, major events that have shaken the world . . . Yet at their core, all his stories are most acutely concerned with people. All sorts of people. Some are people you'll love, some you'll hate. But you will need to find out what happens to the people who inhabit these stories. Because Frederik Pohl imbues his characters with a depth and individuality that makes them as real as people you see every day. Of course, he also employs a mind-boggling variety of scientific ideas and science fictional tropes with which his characters must interact. And he does it all with seemingly no effort at all. That's some trick. Not everyone can do that . . . but that's why he was named a Grand Master of Science Fiction by his peers in the Science Fiction Writers of America. Here are his two Hugo Award winning stories, "Fermi and Frost" and "The Meeting" (with C. M. Kornbluth), along with such classic novellas as the powerful "The Gold at the Starbow's End" and "The Greening of Bed-Stuy," and stories such as "Servant of the People," "Shaffery Among the Immortals," and "Growing Up in Edge City," all finalists for major awards. And dozens of other wonderful tales, like "The Mayor of Mare Tranq" and the provocative "The Day the Martians Landed" and many others. Altogether, a grand collection of thought-provoking, entertaining science fiction by one of the all-time greats! At the Publisher's request, this title is being sold without

Digital Rights Management Software (DRM) applied.
